

MediGenie

Transforming Outpatient Care in Ayurveda

SEAMLESS OPD MANAGEMENT FOR LOCAL & GLOBAL PATIENTS

Digital Pulse Assessment with Nadi Tarangini

Key Features

- ▶ **One-click integration** from the patient's electronic medical record (EMR) to the Medi Genie application.
- ▶ **Automatic association of pulse assessment reports** with the patient's digital medical record for future reference.
- ▶ **Centralized storage** of pulse analysis reports alongside consultation notes, investigations, prescriptions, and follow-up history.
- ▶ **Supports evidence-based clinical decision-making** by providing digital pulse assessment data to complement the physician's clinical expertise.
- ▶ **Quick access to historical pulse reports**, enabling practitioners to compare patient progress across multiple visits.
- ▶ **Eliminates manual documentation** by digitally preserving pulse assessment records.
- ▶ **Integrated workflow**, allowing doctors to perform pulse assessment, consultation, prescription generation, billing, and follow-up management from a single platform.
